#### **A/Comprehension: (07pts)**

*Read the text carefully then do the activities.*

**The Time Machine** is a science fiction movie edited by Simon Wells, a famous English film maker. It was first published in 2002. The story is about a man called Alexander who invented a time machine that he uses for the first time to visit the past. He wanted that expedition in order to prevent the death of his fiancée Emma who murdered before. Accidentally he found himself in the year 802701.

In that year, the world is controlled by beings that live underground called the Martians. The Martians control a humanlike group of beings that live on the surface of Earth. They are called the Eloi. The Martians treat the Eloi very badly. They butcher and cook the Eloi as a source of food. They are strict and the Eloi are terrified of them. Alexander spends most of his time on Earth's surface with the friendly Eloi. He ends up saving the life of an Eloi named Weena. Weena becomes dedicated to the Time Traveler and accompanies him in his exploration of the world, as it existed in 802701.

The Time Traveler becomes an enemy of the Martians. This causes them to attack the Time Traveler, and kill his good friend Weena. The angry Martians try to capture him, but he frees himself and his time machine. He used it to escape from the year 802701. Before the Time Traveler returns to his time, he sees glimpses of the future. He sees the end of the world starting to take form.

Then, the Time Traveler returns to his own time. He tells his friends what had happened to him. They, unfortunately, do not believe him.
