## اختبار الفصل الأول

### Part One: Reading (15pts)

#### Read the text carefully then do the following activities:

Counterfeit medicines are a threat to health, and the risks they pose have been largely underestimated. Infact, the counterfeit medicines that contain no active ingredient will fail to cure any disease, and **those** with wrong ingredients may cause mental and physical damage-and even death. No area of the world is unaffected by this kind of medecines,as revealed by the recent deaths in the USA.

Growing evidence shows that the problem is disproportionately severe in developing and emerging-market countries,which also have the highest burden of infectious diseases .National governments have the primary responsibility both in stopping criminal manufacturing and the distribution of counterfeit medicines and protecting **their** citizens from the dangerous consequences of these products.The Food and Drug Administration(FDA) is highly active in fulfilling this responsibility, but this is not true in many other countries of the world.

Multilateral organizations such as the World Health Organization (WHO),theWorld Customs Organization(WCO), and the World Criminal Police Organization(Interpol)must do more to expose the problem and help countries to set more stringent laws to control the production of medicines.

Companies affected by counterfeiting in developing countries are expending private resources to perform roles which should be carried out by police and regulators, including assisting multilateral organizations in building capacity among local customs and regulatory officials.
