Text:

Dr Belgacem Haba is a famous Algerian scientist in the field of technology. He was born in 1957 in Wad Souf. He went to Amir Abd-Elkader High school in Touggourt before joining the University of Bab Ezzouar in Algiers where he completed a DES (Diploma of Higher Education) in physics.

He went to America, after that he moved to Japan where he stayed there for 6 years. He was working in the application of laser technology while he was living there. Then, he moved on to work on miniaturisation of cameras.

Miniaturisation means make things and products smaller in shape. He returned to America where he worked in different places. Dr Belgacem was working in America while he was making researches at the same time. That's why he became a successful person.
